About Our Staff

Keyboard Kids Pre-School prides
itself with the quality of its staff.
The teachers are the inspiration
which guide and influence our
students.

Our teachers have superb
educational qualifications
and experience, yet are
chosen for their genuine
love of teaching. Their respect
for young children is apparent
in all they do.

Philosophy

Our Early Childhood curriculum is designed to provide an educationally sound, well rounded and FUN program for children ages 3 - 5. We provide learning experiences which are innovative, unique and creative. Our staff takes pride in playing an important role in the development of our students socially, emotionally and intellectually. Our program celebrates the imagination and spontaneity of children and their willingness to learn by doing.

Keyboard Kids Pre-School also provides many social opportunities for our children. Parents, teachers and students are a family at Keyboard Kids. We host many school wide events each year, which bring together all those people who are important to your child.

Most importantly, we believe in allowing children the freedom to express themselves through play. We nurture our students and help them to develop strong self esteem and a sense of independence. We encourage friendship and acceptance among all our students.

Keyboard Kids Pre-School and Kindergarten

A place where kids love to learn!

IMAGINATIVE

encourage imaginary play by providing creative settings for role playing, dramatic expression and animation.

CREATIVE

allow children to experiment with different media, textures and tools in our "board" center which includes magnetic, lucite, chalk, peg and paint.

MANIPULATIVE

provide puzzles, blocks, legos, construx and other building toys.

DRAMATIC

foster self expression through acting, singing and dancing.

GROSS MOTOR

develop skills in our outdoor play area and indoors with large child size play blocks for climbing and building.

FINE MOTOR

develop skills by using various art materials, puzzles and a wide variety of toys.

MUSIC

expression by using musical instruments, finger plays, songs and multimedia CD ROM.

ART

foster creativity with a multitude of materials for tactile and visual stimulation.

COMPUTERS

provide the unique opportunity for interactive learning through the daily use of computers. This fun experience encourages independent thinking and creativity by using dynamic software designed for children.

READING

use of language arts through books, stories, play acting, songs and other printed material including multimedia CDs on a computer.

MATH

introduce math concepts by sorting, counting, manipulating and identifying patterns.

SCIENCE

promote awareness of the world through nature, animals and all living things.
